CORPORATE MEMBERSHIP

ASCP – Representing the heavy duty concrete pavement industry in Australia

BENEFITS OF CORPORATE MEMBERSHIP

**Technical
representation**
of industry to clients

Education of staff
through training courses, workshops,
conferences and forums

**Networking
and sharing of
information**
and experiences with other members

**Participation in
ASCP committees**
and workgroups

**Online technical
resources**

**Promotional
opportunities**
at ASCP events and on website

Recognition at all ASCP
events and on ASCP website

**Member employee
entitlements**

**Discounts on
training courses**
and event fees

WHAT ASCP DOES

▲ FORUMS, CONFERENCES & WORKSHOPS

Typically, 7-10 Forums are conducted each year online (webinar), and in Sydney, Brisbane and Melbourne. Additionally, we hold a two-day biennial conference, with international presenters on strategic topics – these usually have over 150 delegates and 30 presentations. A workshop on strategic topics follows the conference, with additional special topic workshops throughout the year. Ample networking opportunities are programmed into each event.

▲ TRAINING COURSES

Courses for engineers and field staff are conducted online and face-to-face, including the TfNSW Concrete Paving Crew Training (Grey Card). Since its commencement in 2006, there have been over 200 courses training more than 4,000 paving crew personnel. Also offered are courses in paving practices, jointing, and specifications. Courses are held along the eastern seaboard, subject to demand.

▲ TECHNICAL ADVOCACY

Interaction with client authority decision makers and advisors on cost and performance attributes of concrete pavements. Active projects include road pavement construction and maintenance costs, performance, concrete overlays for major road rehabilitation projects, concrete pavements for airfields, intermodals and ports, and road pavement noise.

▲ NEW TECHNOLOGY & RESEARCH

Identify the need for new technology. Access to international organisations to source new technologies. Supported at biennial conferences through invited international presenters. Identify research topics, encourage and facilitate research, and promote research findings. Actively encourage students to present their papers at ASCP events as part of their professional development.

▲ REPRESENTATION TO CLIENTS AND STAKEHOLDERS

Regular liaison with TfNSW, other State Transport Authorities and Austroads about technical issues, pavement technology and guide documents. ASCP encourages input from members to identify and propose improvements on technical issues.

▲ TECHNICAL RESOURCES, INDUSTRY WORKGROUPS & NEWS

Workgroups are established as required for specific issues such as future road projects, concrete airfield pavements, concrete road pavement maintenance, and joint sealants. ASCP Pavement Notes and papers, ASCP forum presentations and conference presentations are made available to members on the ASCP website, as is a monthly newsletter which includes links to new technical reports, international outcomes, conferences and events, and people and company news.

▲ INTERNATIONAL AFFILIATIONS

Established liaisons with international associations, relevant corporate organisations (including consultants, paving equipment manufacturers, client authorities, academic institutions), and international professionals in strategic fields. This includes discussion groups which seamlessly connect members from EUPAVE, ISCP and ASCP.
